COD delivery service available nationwide – please call for details.

Installing Enviroclad Decorative Cladding:

- Ensure walls are clean & dry. Remove loose tiles, loose paper, flaking paint.
- Ensure shower tray/bath is fully installed. Remove/loosen fittings from walls. (Shower fittings, soap holders, etc).
- Seal bath trim (if using) into position.
- Fit bottom Starter trim onto Bath seal using sealant (Fig. 1).
- **Fill bottom Starter trim with sealant.**
- At a corner, fit Internal Corner Profile, seal with silicone or apply bead of silicone (Figs.2 & 3).
- Cut first plank to length - less 10mm, to allow fitting into top and bottom Starter trims (also allows for expansion).
- Apply adhesive to reverse of plank - horizontal strips to width of plank, approx. every 400mm.
- Fit plank in position & press firmly onto wall.
- If cladding shower/over bath, seal lip of each plank with silicone before fitting the next to ensure watertight seal (Fig. 4).
- Cut top Starter trim to length, place in position and continue (Fig. 5).
- External Corner profiles are available for use on corners if required.
- When fitting cladding to a shower, Starter trim can be used as a stop bead at shower door or to finish edge of the final plank.
- Ensure adhesive and sealant are cleaned from face of cladding before they set.
- Cladding can be fitted behind radiators but is not suitable for use with a direct heat source, e.g. solid fuel cookers (heat greater than 60°C). A stainless steel panel should be fitted behind cookers/hobs.
- Please refer to the current brochure for full product details.
- Recessed Lighting: Please note that only PL or CL type low energy downlighters are suitable for use with Enviroclad ceiling panels.
- Bleach not to be used on Silver/Gold infils.
- Return of goods will be accepted within 30 days with proof of purchase.
